

Cabin

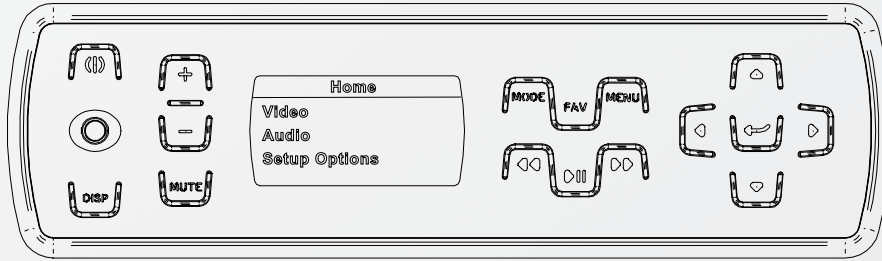

Our integrated entertainment system delivers better performance, convenience and improved user enjoyment.

Trying to piece together entertainment systems from separate components can be a frustrating ordeal, and can result in a less than ideal product. Heads Up can help you eliminate the headache and hassle of multiple remote controls, limited flexibility and reduced functionality. With our integrated entertainment system, a single in-seat cabin switch panel lets you control the options for work or play. Enjoy listening to your favorite satellite radio programming, watching DVDs in high definition, letting the kids play their favorite video game or making in-flight client presentations. Our slim-line controllers with OLED displays make selecting easy, while high definition monitors and Blu-ray players provide exceptional clarity. And the integration of this system minimizes parts count, enhances reliability and enables professional installation. Talk to Heads Up – and take control of your next entertainment system.

Cabin Entertainment

Integrated Audio and Video Systems

System Components

Integration.

Our integrated solutions allow you to easily manage all of your choices from a single in-seat panel. Avoid the hassle and worry of keeping up with multiple remote controls, systems and switches. With Heads Up's integrated approach, you have all the options right at your seat.

Flexibility.

From satellite radio to complete audio/video systems, Heads Up offers a wide range of options, including:

- In-Seat Controls w/Integrated Head-Phone Jacks
- Sirius XM Satellite Radio at Each Seat
- MP3 Support
- Aux Audio Input
- Multiple Blu-Ray DVD Players
- SVGA, Component & Composite Inputs

Quality and Affordability.

With Heads Up, you can expect quality products, affordable prices, and a level of service that is second to none. Features such as our embedded differential signaling provide for longer cable runs with maximum video clarity. No extra filters are required – everything is simply built into the products to minimize parts and enhance the overall viewing experience. One-stop shopping not only gives you an added level of convenience, but also provides a clean look to your interior with a fully integrated and manageable system.

Innovation Obsessed. Solution Driven.

Heads Up was formed for one purpose: To elevate the aviation experience for pilot and passenger by providing the most innovative cockpit, cabin and aviation electrical solutions in the industry. For information on this or any of our other products, or to discuss how Heads Up can help make your vision a reality, contact us today at info@heads-up.com or call 1.800.367.4770.
